

Report on Service Indicators for half year to 30th June 2010

Since 2000, each County and City Council has been required to monitor progress in respect of Service Indicators – reports have been issued to this Council each year, setting out our achievements and indicating areas of concern.

Following a national review which was carried out in 2003, the number of service indicators to be monitored was extended from 21 to 42 and it became necessary for the Town Councils to commence monitoring from the 1st January 2004. A further national review saw changes introduced in the indicators from 2008 with changes in methodology in respect of some indicators, deletion of some indicators and introduction of new indicators. Currently the total number of indicators is 46.

The combined results for North Tipperary Local Authorities (North Tipperary County Council, Nenagh Town Council, Thurles Town Council, Templemore Town Council and the County Tipperary Joint Libraries Committee) in respect of half year to 30th June 2010 are detailed below with comparative results for the full year 2009. Footnotes denote where contextual comments were included with the indicators. The indicators in respect of the Library Services reflect all branches in County Tipperary (North & South). 2010 Service Indicators which relate to population are based on 2006 Census figures i.e. 66,023 with the exception of the Library Services where the total population (149,244) of Co. Tipperary applies.
